***New Hire for Clinical Site Services***

Severna Park, MD - Clinical Site Services (CSS), a Maryland company focused on managing the trial enrollment process for sponsor companies, CROs and investigative sites, has appointed Kristen Chumley as Senior Media Planner/Buyer.

Ms. Chumley’s role at CSS will include the development and implementation of strategic patient recruitment plans, coordination of media buys and metrics analysis.

“We are thrilled to welcome Kristen to CSS. She brings a new viewpoint, an array of talents and valuable skills to our company,” said Chris Trizna, President of CSS. “We look forward to her work being an integral part of our growth.”

Prior to joining CSS, Kristen served as an assistant account executive for a large advertising agency, in which she managed various clients in the healthcare industry. Kristen is a 2006 summa cum laude graduate of Towson University, with a bachelor’s degree in Business Administration and concentrations in Marketing and Advertising.

Clinical Site Services (CSS) is a site performance company that provides services to increase the enrollment potential for investigative sites. Through a proprietary, integrated process, CSS strives to reduce the costs and timelines associated with recruitment subjects for clinical studies.
